

How to download and install the "HASP License Manager"

(when using version 8 or higher with a network license)

Overview

If you are using a network license, you have to also install the "HASP License Manager". You must do this manually.

Note: Other drivers are necessary for the protection key ("HASP drivers"); they are installed automatically when installing the software.

On the computer/server hosting the network key, you must install them manually.

These drivers or services may also be called "Sentinel LDK License Manager", or "RTE (Run-time environment)", "Run-time installer".

They also include the "Sentinel Admin Control Center".

If you encounter problems with your network license, we recommend that you first re-install these HASP drivers. [More information...](#)

Installing the "HASP License Manager" as a service ("Hasp Loader"), using the file "lmsetup.exe"

- Locate the Mountains® installation files.
- Open the "Hasp" folder.

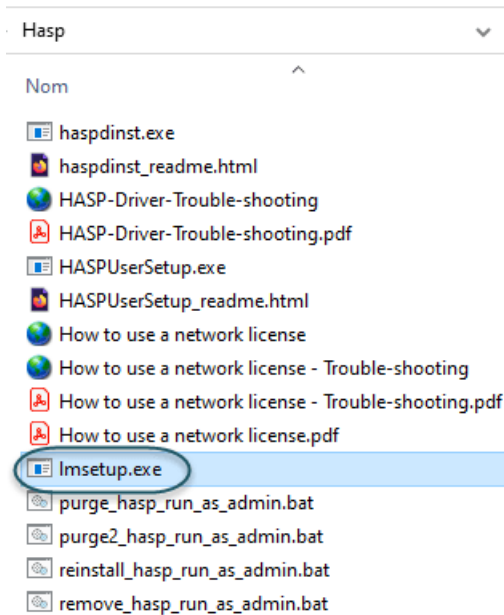

If you cannot find your installation files, or if your installation files are too old and do not contain the file "lmsetup.exe":

- Go to [Software updates](#), and download "DRIVER DONGLE HASP" ("hasp.zip").

Drivers

HASP / Aladdin	
 Install	DRIVER DONGLE HASP ZIP file, 53MB

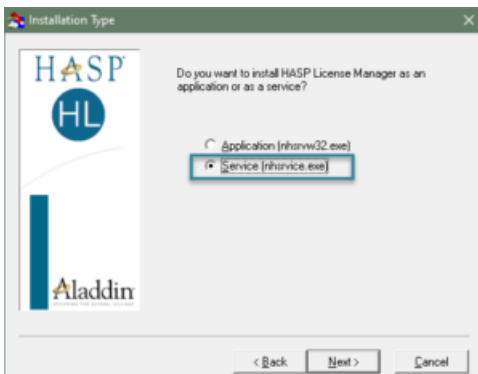

- Unzip the files.

- Right-click and run (as administrator) "lmsetup.exe", to install the "HASP License Manager". Choose a language for the installation. Several dialogs guide you through the installation process:

- When asked if you want to install the "HASP License Manager" as an application or as a service, choose "Service":

- Follow the steps until the final installation.

Note: Once installed, this service is called "**Hasp Loader**".

Starting Mountains® software

You should now be able to use Mountains®.

In case of problems, see also: [Trouble-shooting in case of network license problems](#)
